

Isolation & Actuation Technologies Introduction

Selecting the Right Solution for your Application is Key!

COURSE OUTLINE:

Poor isolation in a process line can lead to leakage, asset damage, and most importantly unsafe working conditions. Properly selected and engineered solutions are your last line of defense in preventing these costly issues. In this complimentary one day seminar hear from factory and industry experts discussing the latest technologies and best practices. This course focuses on basic terminology along with the proper methods utilized in selecting appropriate valves for your plant. **Whether you are protecting your people, process or assets, understanding Isolation and Actuation is vital to your organization.**

Date: June 12th, 2019
(Lunch & Refreshments Included)

Time: 8:30am - 4pm

Location: Lakeside Process Controls
2475 Hogan Drive
Mississauga, ON
L5N 0E9

LIMITED SPACE AVAILABLE

THE RIGHT SOLUTION

THE RIGHT SOLUTIONS WILL HELP WITH:

- Long Service Life
- Protecting Critical Assets
- Safe Operations

AGENDA

- Isolation Valve Types and Terminology
- Selecting the Right Valve for the Proper Application
- Actuation Technologies Overview
- Service and Repair Best Practices

Network with peers facing similar challenges & connect with our Final Control Team

WHO SHOULD ATTEND:

Typical attendees include:

- Maintenance Managers/Supervisors
- Operations Managers/Supervisors
- Project Managers
- Reliability Managers/Engineers
- Process Engineers
- Maintenance Personnel
