

# Micro Motion® Series 1000/2000 & 5700 Transmitters & Sensors

Understanding the integral parts and diagnostics, helps to quickly understand the issues with either the process or meter

COURSE 2358 CEUS: 0.7

## AGENDA

# MICRO MOTION™

### Overview:

This 1-day course consists of a blend of lectures and hands-on exercises that cover the installation, configuration, calibration checks and troubleshooting of Micro Motion sensors with the Series 1000/2000 and 5700 transmitter.

The hands-on exercises will use running demos, two people per demo. There is a maximum of 10 students per class.

The instructor has 30 years' experience in process control and instrumentation and 20 years working with customers commissioning and implementation in Micro Motion Coriolis technology across wide range of industries. The instructor is factory certified trainer. With field experience and knowledge to your specific industry the class the instructor will share best practice to maintain your Micro Motion Coriolis asset.

Each class will get a copy of Prolink III Professional license valued at \$1000.00. Therefore, if you have portable computers with latest Windows, it is recommended bringing to the training session.

### Topics:

- Principles of Operation
- Installation Recommendations
- Transmitter Configuration
- Sensor Calibration
