

2019 Reliability Course Schedule

[CLICK HERE to visit our Training and Development Guide](#)

MARCH		COURSE DESCRIPTION	EARLY BIRD PRICE	PRICE
4 - 7	Thermography Level II with Certification	Designed for the practicing thermographer interested in more advanced infrared training. Full course description HERE.	N/A	\$2,395.00
12	Introduction to AMS 2140	Learn the basic functions of the AMS 2140 Machinery Health Analyzer. You will learn how to take and analyze vibration data using the 2140. This course is geared towards those familiar with vibration analysis. Learn more HERE.	\$480.00 before Jan 12 \$540.00 before Feb 12	\$600.00
18 -21	Thermography Level I with Certification	This course is geared to the new infrared camera user and focuses on how thermography is used for a variety of condition monitoring/predictive maintenance applications. Full course description HERE.	N/A	\$2,395.00
APRIL				
8 - 12	Airborne Ultrasound Certification Level II	Designed to meet the intent of SNT-TC-1A and is in accordance with ISO 18436-8. Students will learn to calibrate equipment, interpret and evaluate results with respect to applicable codes, standards, and specifications, and organize and report inspection results. Full course description HERE.	N/A	\$1,495.00
MAY				
6 -10	Basic Vibration Analysis Category I with Certification	This course enables students to operate single channel machinery analyzers, dump and load routes, recognize the difference between good and bad data and compare vibration measurements against pre-established alert settings. Full course description HERE.	\$1,836.00 before Mar 13 \$2,065.50 before April 4	\$2,900.00
21 -24	Thermography Level I with Certification	Geared to the new infrared camera user and focuses on how thermography is used for a variety of condition monitoring/predictive maintenance applications. Full course description HERE.	N/A	\$2,395.00
JUNE				
10 -11	Materials Management Strategies	An introductory course designed to provide participants instruction about how to manage, organize, and control inventory risk through strategic MRO inventory management. Full course description HERE.	\$1,310.00 before April 10 \$1,485.00 before May 21	\$1,650.00
17 -20	Thermography Level I with Certification	Geared to the new infrared camera user and focuses on how thermography is used for a variety of condition monitoring/predictive maintenance applications. Full course description HERE.	N/A	\$2,395.00
25 -28	Certified Reliability Leader Workshop	The Certified Reliability Leader workshop focuses on whole life asset reliability decisions and whole life value delivery through leadership. Full course description HERE.	\$1,999.00 before May 31 Price for this course in USD	\$2,199.00

Lakeside reserves the right to cancel or postpone an event due to inclement weather, low enrollment or other unforeseen circumstances

AUGUST		COURSE DESCRIPTION	EARLY BIRD PRICE	PRICE
6 - 9	Thermography Level III with Certification	This course teaches thermographers how to establish a successful thermography program across a variety of applications and industries. Full course description HERE.	N/A	\$2,395.00
13	Introduction to AMS 2140	Learn the basic functions of the AMS 2140 Machinery Health Analyzer. You will learn how to take and analyze vibration data using the 2140. This course is geared towards those familiar with vibration analysis. Learn more HERE.	\$480.00 before Jan 12 \$540.00 before Feb 12	\$600.00
20 - 23	Thermography Level I with Certification	Geared to the new infrared camera user and focuses on how thermography is used for a variety of condition monitoring/predictive maintenance applications. Full course description HERE.	N/A	\$2,395.00
SEPTEMBER				
9 - 12	IR Electrical / Mechanical Inspections	This course gives the student a depth of knowledge necessary to perform IR investigations of single or multifamily dwellings to identify, envelope, moisture, electrical and mechanical issues. Full course description HERE.	N/A	\$2,395.00
23 -27	Airborne Ultrasound Certification Level I	Comprehensive course in which the theory, principles and practices of Airborne Ultrasound Technology are taught. Conforming to the classroom requirement of ASNT Recommended Practice, SNT-TC-1A and in accordance with ISO 184368. Full course description HERE.	N/A	\$1,495.00
OCTOBER				
7 - 10	Advanced Maintenance Planning	An intensive, hands-on course designed to simulate real-world situations and teach participants how to effectively execute the planning function. Learn more HERE.	\$2,080.00 before Aug 7 \$2,340.00 before Sep 7	\$2,600.00
7 - 10	Thermography Level I with Certification	Geared to the new infrared camera user and focuses on how thermography is used for a variety of condition monitoring/predictive maintenance applications. Full course description HERE.	N/A	\$2,395.00
21 - 25	Intermediate Vibration Analysis Category II with Certification	Learn to select appropriate vibration measurement techniques, set up instruments for basic resolution of amplitude, frequency, and time. Full course description HERE.	\$1,836.00 before Aug 21 \$2,155.00 before Sep 21	\$2,295.00
DECEMBER				
2 - 5	Thermography Level I with Certification	Geared to the new infrared camera user and focuses on how thermography is used for a variety of condition monitoring/predictive maintenance applications. Full course description HERE.	N/A	\$2,395.00
