

## BIFFI MORIN QUICK ACTING ACTUATORS

Actuation and controls packages that allow fast closure of ESD valves without component damage, ensuring long and reliable service.

### FEATURES

- Quick acting automation for critical need, high response ESD systems.
- Automation packages designed specifically for ESD applications.
- Operating times of < 1 second.
- Available as 'trip' (on-off) or 'trip-throttle' (modulating) control.
- Suitable for any quarter-turn application, typically for ball and butterfly valves.
- Designs based on years of experience in quick acting automated packages.
