

BIFFI MORIN ADJUSTABLE LOCK-OUT DEVICE

Integral to the actuator, this option allows operators to lock-out the valve assembly mechanically in a safe position in critical applications when required.

FEATURES

- Fully adjustable: after travel stops are set, the locking nut allows easy pin alignment.
- Safety red indicator indicates valve assembly is in locking position.
- Travel adjustment unaffected by lock-out position.
- Meets OSHA requirements.
- Available on most Biffi Morin actuator models.
